

External Customer Displays

An external display only for the customer's follows up of each price? No, with this kind of customer display the shop owner can run their own individual advertisement and that for free! Pictures on a normal SD card will be presented over a slideshow automatically beside of the current transaction and the last positions of the receipt.

QUORION CD701

The Customer Display QUORION CD701 is an innovative and revolutionary product which is an alternative to the current 2-line customer display in the market. It is suitable for promoting your products in a interactive way.

The image displaying ability allows shop owners to show customers their products impressively. The text displaying feature will be used to show any transaction message and product information. VESA mounting is also available for easy installation.
